

# Learn About Accessibility Features

## Overview

Panopto offers accessibility features that allows users to easily navigate and read the Panopto web interface. The web interface supports screen readers for all available creator and viewer interfaces. The web interface also support keyboard access, allowing you to use the tab key to access all available functions. All sessions fully support adding and displaying captions.

For additional information on Panopto's accessibility features, please visit [Panopto's Accessibility Conformance Report \(WCAG Edition\)](#).

### Prerequisites

- Creator or Admin access to Panopto

## 1. Screen Reader Support

Here are the screen readers that we regularly test with:

- JAWS
- NVDA
- VoiceOver for Mac

## 2. Keyboard Access

2.1. All of the functionalities and links in the web interface are accessible by using the **tab key**. The tab key will move from function to function and you can hit enter to use that function. A few of these functions are highlighted below, but every function is accessible (See Figure 1).

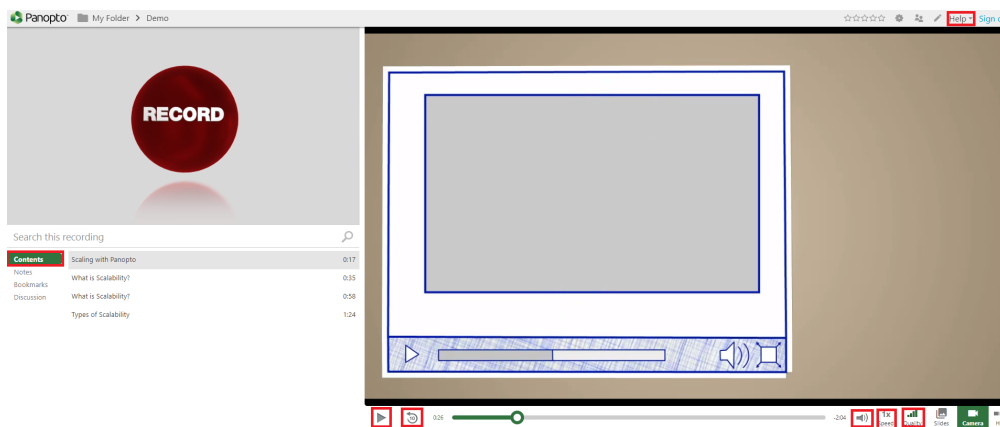

Figure 1

## 3. Viewer Captions

3.1. The Panopto viewer will display captions for the session when available. The caption will show in two places. The first is under the **Primary Video** in the **Captions** tab. The caption that is currently being spoken will be highlighted in grey (Fig. 2).

The screenshot shows the Panopto viewer interface. At the top, there is a header with the Panopto logo and the title "Overcoming Top 4 Challenges of Enterprise Video". Below the header is a video player showing a man in a suit speaking. Underneath the video player is a search bar labeled "Search this recording" with a magnifying glass icon. Below the search bar is a list of captions. The list has three columns: the caption text, the time, and a vertical scrollbar on the right. The "Captions" tab is selected and highlighted in green. The current caption being spoken is highlighted in grey.

Contents	with five channels of theater quality audio.	5:46
<b>Captions</b>	The reason is because with video file extension is just a shell,	5:49
Discussion	it's a container for what's inside	5:54
	and what's inside is what matters video and audio codec.	5:56
	Now were not going to get into the details of codecs	6:01
	in this presentation but the key take away here is	6:03

Figure 2

3.2. The second is either overlaid on the secondary video or docked directly under (Fig. 3 and 4).

**Docked:**

- Captions
- Notes
- Bookmarks
- Discussion

Located just north of Kalaloch Lodge, near the Kalaloch Campground, "tree root cave" features a tree like no other.

## 4. Shortcut Keys

The new viewer allows you to use shortcut keys to control the player:

- **Spacebar** - Pause/Play the session
- **Left/Right arrow keys** - skip 5 seconds backward or forwards
- **Up/Down arrow keys** - adjust volume up or down
- **The M key** - mutes and unmutes the recording

## 5. Embedded Player Captions

When captions are available for a session they will also be displayed on the embedded video player. When you embed a video with captions, the captions will overlay the video as shown below. You can see [how to embed videos here](#).
